Summary

Ambitious **Electronics and Communication Engineering** student passionate about **Machine Learning, Data Science, and Deep Learning**. Skilled in building data-driven solutions, deploying ML models, and optimizing performance. Seeking an internship to apply technical expertise, work on impactful projects, and expand professional experience in AI and software development.

Projects

MediCure – AI-Powered Healthcare Platform [GitHub](#)

- Built a healthcare platform with **JWT authentication** and an AI-driven **RAG medical chatbot** using **LangChain** and **LangGraph** for patient queries and report analysis.
- Added telemedicine features supporting **text chat**, **audio calls**, and **HD video consultations** via Twilio, increasing remote care access by **40%**.
- Developed CNN-based models to **predict diseases from X-ray images** (TensorFlow/PyTorch) with **80% accuracy**.
- Implemented a **FAISS-driven RAG pipeline** for fast semantic search across medical documents, reducing retrieval time by **60%**.
- Built **XGBoost models** for disease prediction and automated **diet, workout, remedy, and medicine** recommendations from user symptoms.
- **Tech Stack:** Python, FastAPI, LangChain, LangGraph, SQLite, FAISS, Pinecone, TensorFlow, PyTorch, XGBoost, Scikit-learn, Pandas, NumPy, JWT, Tailwind CSS

VidQuery-AI Youtube Assistant [GitHub](#)

- Developed a **YouTube extension** that answers user queries using transcript extraction and semantic search.
- Built **text-chunking** and a **FAISS** vector retrieval pipeline for fast, accurate similarity search.
- Integrated **Gemini API**, **HuggingFace LLMs**, and **LangChain** for robust response generation.
- Created a scalable **FastAPI backend** with async processing and caching, achieving sub-2s latency.
- Enabled users to extract insights from long videos without watching fully, saving **70%** time.
- **Tech Stack:** Python, FastAPI, LangChain, FAISS, Gemini API, HuggingFace Transformers, HTML/CSS, JavaScript

Education

B.Tech in Electronics and Communication Engineering, IIIT Una
CGPA: 7.84

Aug 2023 – Present

Technical Skills

Programming Languages: Python, C++, HTML5, CSS3, JavaScript

Frameworks & Libraries: FastAPI, Streamlit, LangChain, LangGraph, LangSmith, HuggingFace Transformers

Machine Learning & AI: Machine Learning, Deep Learning, Natural Language Processing (NLP)

Databases: PostgreSQL, Vector Databases (FAISS, Pinecone, Weaviate), ChromaDB

Cloud & DevOps: AWS (EC2, S3), Docker, Git, GitHub, Heroku, Vercel

Additional Skills: RESTful APIs, JWT Authentication, Excel, Power BI

Languages

Hindi: Native

English: Proficient

Achievements & Leadership

Solved 400+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks

Event Coordinator, Mystery Ops and Ard-Win-O Technical Event, IIIT Una
